

Ropes Course

Each 冒险家® ropes course consists of horizontally steel wire ropes, platforms and other materials secured between steel poles to create elements or activities. These ropes courses are very versatile and suit a wide range of indoor and outdoor sites. The highest quality products and safety standards are utilized for each 冒险家® product.

The participant safety system consists of a full body harness and a sling line. Each course has a continuous belay overhead tracking system that prevents participants from disconnecting their sling line from the course at any time. The participant's sling line is inserted into the overhead track before they leave the ground, and it cannot be unhooked from the system until they are back on the ground. The operator is responsible for hooking and unhooking the participants. The safety system also prevents a participant from falling any more than a few inches if they slip off of an activity. This allows them to self-rescue, step back on the element and continue to move through the course. Participants traverse each element by walking, balancing or climbing. This unique system allows participants to choose their path through the course and have the ability to pass other participants at each platform.

Entry Level Ropes Course (1 Layer Ropes Course)

The entry level course which can be configured in numerous layouts to fit your space. The poles form an equilateral triangle, square or rectangular and we currently have courses designed from 3 to more poles. Elements are installed between each pole and you have a choice of different numbers of entrances/exits. Once your ropes course has been constructed, provided you have the space, additional poles and elements can be added at a later date in order to increase the capacity to meet high demand.

The single level is ideally suited to operators looking to offer an introductory ropes adventure experience. They appeal to the whole family, even those with younger children. You can also have low ropes course aimed at 2- 7 year olds, incorporated below it. This allows the whole family to share a ropes course experience.

At just under 5m tall the entry level ropes course can fit into buildings with a relatively low ceiling height. This makes them ideal for indoor play centers as they can be installed around existing equipment or above a seating area enabling operators to take advantage of unused space. Also it can accompanied with other playground equipments.

All harnesses, Lanyards, Helmets, Triple Step Karabiner, Self-made Connector. are also supplied with your 冒险家® Ropes Course.

More pole single level	More elements	More capacity

Medium Level Ropes Courses (2 Layers Ropes Course)

The Medium Level is perfect if you are looking to take a step above our entry-level ropes courses. Similar to our entry level, it's based on our equilateral triangle, square or rectangular pole system , this course maximizes limited spaced areas and can be placed in either indoor or outdoor. The modular construction allows for designs from 5 to more poles.

Medium Level ropes adventure can be further expanded after installation with additional poles and a single level could be increased to a double level. For customers looking for a themed course, we have a tropical, sun shades, and pirate design options available. Our ropes courses is versatile and suits a wide range of indoor and outdoor venues. The double level courses allow participants to progress from the more comfortable first level to test their nerve on elements 5 metres or higher above the ground on the second level.
